

News Letter for Classes III, IV & V

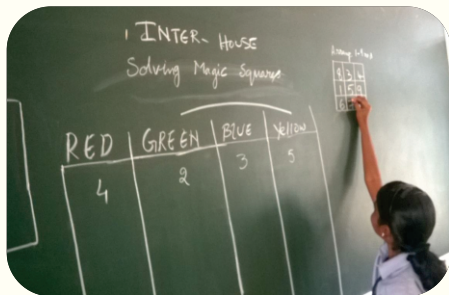

“Kids prosper best with a broad curriculum that celebrates their various talents not just a small range of them” –**Sir Ken Robinson**

Come spring and there is a mood of freshness and splendor everywhere in our surroundings. With energy springing up and enthusiasm growing, it's a perfect time to take stock of the learnings and experiences of the year gone by. The teachers help the students to sum up the year through various activities.

During the month of March, subject wise activities were planned and conducted.

✓ **Mental Mathematics and Patterns :**

- Mathematics is considered a very important aspect of one's intelligence and hence various activities were conducted to improve and enhance their skills. Students spent time in labs practicing Mental Math.
- They also explored shapes, sizes and patterns using commonly available aids such as vegetables and colors. The students enjoyed discovering the various patterns during the vegetable block printing activity.

✓ **Understanding Science through Laboratory based activities:**

- Students were given activities to improve their understanding of
 - Liquids and their utilities
 - Soluble and Insoluble substances
 - Saturated and Unsaturated Solutions
- The students were asked to do activities on filtration of liquids and understanding the magnetic field and their effects.

✓ **Learning grammar through various play way methods:**

- Football game is an activity which helps the students to learn and remember for longer time.
- Hot seat game is an activity that helps the students to overcome stage fear.
- Role play is an activity which emphasizes the interactive skills and transforms the content of education from information to experience.

✓ **Knowing more about our country through social studies:**

- Quizzes were conducted on the topics like
 - States and their capitals
 - Governors and chief ministers of different states.
