

Class II Activities March - 2017

“If a child can't learn the way we teach, may be we should teach the way they learn”
– **Ignacio Estrada**

Children enjoyed the activities like Telephonic conversation, Mental Math, Storytelling , Drawing & colouring etc.,

✓ **Telephonic Conversation:**

Helloooooo.....

When you lift the phone, you say "Hello". The real meaning of "Hello" is the name of a girl, "Margaret Hello". She was the girlfriend of Graham bell who invented the telephone.

Communication adds intimacy. How do people become open in a relationship? Good communication, of course, because it is the only bridge between a relationship. Communication is the relationship. Communication plays a very important role in bringing people together and understanding each other better, wherever they are.

Though this activity, children learnt the Phone manners. They learnt to identify themselves first, by saying, "Hello, this is Ajay.. May I please speak to Sudhir?" They have also learnt to say "Thank you" and "Goodbye."

✓ **Mental Math:**

Check your ability to calculate....

Practising mathematics doesn't just help students develop academically, it's also a useful life skill. Our brain is more powerful than a computer and a calculator. People who practiced like Shakuntala Devi proved themselves to be the human computers. Quick calculations will improve the grasping and comprehending skills. People who practice quick maths will be good analysers and decision makers.

Through this activity, the children learnt that practicing maths is all about understanding, not just memorization. The children understood that applying simple logical steps, it's very easy to do maths with perfection.

✓ **Story Telling:**

Once upon a time.....

Stories teach us about life, about ourselves and about others.

Narration needs a lot of vocabulary and creative thinking. It plays a major role in improving the language. Children have an innate love of stories. Stories create magic and a sense of wonder at the world.

Through this activity, children have improved in their verbal proficiency. This activity also encouraged students to participate actively and also to enhance their listening skills

✓ **Drawing & Colouring:**

Wow....what an art!

Painting and drawing are two very enjoyable activities. Drawing improves creativity and helps to put down one's imagination in the form of pictures. It develops clarity in expression.

Colouring helps to have control on oneself and develops aesthetic sense. These activities would be healthy ways of enhancing the creative skills that children already manifest.

This activity, the children improved in their fine motor skills, , eg. grasping, holding, and eye-hand coordination. This activity also helped children to pay attention to details as they study their objects carefully while participating in drawing & colouring activities
