

From the Correspondent's desk.....

Big journeys begin with small steps.'

The new year is round the corner and, with it, a lot of hope and aspirations awaiting fulfilment! This is especially true for all the students who are to appear for the board exams in 2024.

Each one of us would like to succeed in all endeavours that we undertake. Is there any one mantra for success? Unfortunately, no!

All the successful persons have clear set goals, a passion for excellence, perseverance, self-confidence and determination to succeed which sets them apart from others who are less successful. Hence, my dear children, in order to succeed one needs to have the right mindset and belief in oneself. Wishing you all a very happy and successful new year!

Ms. Jayashree Iyer,
Correspondent
T.I.M.E. School, Hyderabad

From the Principal's desk.....

Dear Readers,
Greetings of the season!

The onset of winter in December month brings us to do introspection of year 2023 and also to have new resolutions in the year 2024. As we had celebrations of achievements, a reminder of the joy in learning, and an expression of gratitude in the year 2023 for the incredible support we receive from our students, parents, and staff.

Our students continue to shine brightly, showcasing their talents and dedication. Whether it's in the classroom, on the stage, or through extracurricular activities, their enthusiasm for learning is truly commendable.

As we embrace the spirit of the season, let's reflect on the values of kindness, compassion, and gratitude. This year end month is an opportunity to connect with loved ones, express gratitude for the year gone by, and look forward to new beginnings. I encourage each student to take a moment to reflect on their personal growth and achievements throughout the year to move ahead with new resolutions as New Year is approaching.

May this festive season bring you joy, warmth, and memorable moments with your loved ones as we bid farewell to 2023, let's look forward to the promise and potential that the upcoming year holds.

Wishing you all a delightful winter season and a Happy New Year!

Warm regards,

Mr. Phanindra Bora

T.I.M.E. School, Kandlakoya

Importance of Reading

“Reading is essential for those who seek to rise above the ordinary” Reading is one of the most basic skills and should be encouraged from the very beginning. This habit should be inculcated in children from infancy. A child who listens to bedtime stories that are read aloud by his parents will certainly be a good listener, and will gradually develop an interest for reading. Reading is a way of dreaming with your eyes open.

A person having a passion for reading is certainly more knowledgeable and will also develop a flair for creative writing. They will be eloquent speakers with an excellent vocabulary, thus developing confidence and it will make you rise above the ordinary. Also, reading is considered to help in relaxing and a good stress buster. Those who love reading will certainly agree that this habit broadens one’s horizon.

So start young, develop this habit and use this skill to be successful and empowered. Reading is to the mind what exercise is to the body. ‘Happy Reading’.

Understanding and Managing Your Digital Footprint

Our digital footprint refers to the trail of data we create while using the internet. It includes our social media posts, online purchases, website visits, email interactions and more. Essentially, it's the digital record of our online activities. Managing it involves being mindful of what we share online and taking steps to protect our privacy and security.

Our digital footprint is not just a collection of data; it's a virtual reflection of our identity, actions and choices. It can have far-reaching consequences impacting various aspects of our life.

As students, your digital footprint is an evolving aspect of your identity. Being mindful of how you navigate the digital space and proactively managing your online presence can empower you to shape a positive and impactful footprint - one that amplifies your strengths and values while safeguarding your privacy and security.

Remember, each click, post, and comment contributes to your digital footprint. Take charge, make informed choices, and leverage this digital landscape to build a promising future.

A visit to Anganwadi:

A fun-filled and delightful day for the students of classes I and II. They visited the local Anganwadi at Gowdavalli. The students interacted with the children, entertained them with songs and performed some dances. They talked and mingled with them happily. Sweets and chocolates were distributed to the little ones at the Anganwadi. This brought immense joy and our students understood the value of ‘Sharing is Caring’

Open House Discussion:

First ‘Open House Discussion’ was held in our school on November 24th. The students of the Pre-Primary and Primary classes actively participated in this event. This event was a platform for the little ones to speak on topics related to languages, Science, Mathematics and an array of topics. Parents graced the occasion and appreciated the exemplary display of confidence and zeal in the young students.

English Project Exhibition:

'TIME GALAXY' was held on the 22nd November. The English Lounge had a plethora of items ranging from games, riddles, tongue twisters, puzzles, word searches etc. Keeping in mind the Theme- Digital India, there was a wonderful display of artistically made charts portraying the Origin and Aim of Digital India. Charts related to the English language such as Archaic Words, Homophones, Poems, Famous English Poets, Idioms etc. were displayed. The room was beautifully decorated and the caption ' Young Minds Bloom Here' was apt. It was visited by one and all, more so to try their luck at the various games and win chocolates. It was a Cynosure of all eyes.

Science Exhibition in Time School has become a tradition which encourages scientific curiosity in students. Scientific temperament has always been an essential characteristic of an individual. Our students plan and prepare all through the year for this event. Many working models based on hydraulic pressure and solar energy were made by students of classes 6& 7. Juniors had the regular models of volcanoes, Newton's disc, hydraulic lift, blood circulation in the heart etc. Our Chandrayan -3 model and remote-control car were much appreciated. Seniors had face-recognizing apps and obstruction-avoiding robots. This way our school ensures the building of scientific temperament in students.

Telugu Project Exhibition-

T.I.M.E. పాఠశాలలో ప్రాజెక్ట్ ఎగ్జిబిషన్ నిర్వహించారు. ఇందులో భాగంగా 21 సెంచరీ డిజిటల్ ఇండియా అనే విషయంపై విద్యార్థులు వివిధ కార్యక్రమాలు నిర్వహించారు. అందులో భాగంగా బుర్రకథను ప్రదర్శించారు. రామాయణ చిత్ర వృక్షం తయారు చేశారు. డిజిటల్ విభాగంలో భాషా సాహిత్యంలో వచ్చిన మార్పులను వారు వివరించారు.

Social Science Exhibition: Our theme was 21st Century Digital India. We have portrayed a tree with roots as values of our country, stems and branches as technology and flowers as development and growth at the centre of the room. We portrayed the transformation of India in different sectors by dividing the room into three sectors - Primary, secondary, and tertiary. In the Primary Sector, we projected our journey from primitive to commercial agriculture. In the Secondary Sector, we projected the development taking place in manufacturing a wide range of goods and getting competitive in the international market. In the Tertiary Sector, we showed the digital transformation of various services.

Showcasing IT Displays at our School Exhibition:

The various exhibits include Coding and Programming, Robotics, Multimedia Presentations, Story Board, and Innovative Applications. Moreover, the event was not just about showcasing final products; it was a celebration of the learning journey undertaken by our students. This exchange of ideas and perspectives enriched the learning experience, providing invaluable insights and encouragement for our budding technocrats.

A few lines of Math

- The strength of a nation lies in mathematics and its commitment and capacity to prepare its people to meet the needs and aspirations of a progressive society.

M ----- Miracle of nature
 A ----- Art of arithmetic
 T ----- Tool of knowledge
 H ----- Habit of Problem-solving
 S ----- Science of learning

The highlights of Math projects (2023-24)

Display of digital videos using Hologram

Nets of 3D geometrical figures

Angles using Dance Mudras

Display of mathematical illusions

Euclidian and Non-Euclidian geometry

Relation between HCF and LCM using colourful beads

Working model of Pythagoras' theorem

A visit to our Sibling School's Project Exhibition

It was an exciting day on 24th November as we visited T.I.M.E school Bandlaguda, for their project exhibition. The theme of their exhibition was 'The G20 countries'. There was a lot of information about their culture, traditions, monuments and their national sports. Countries like Italy, France, Britain, Germany, India, etc. displayed their significant milestones and technological advancements.

We saw lots of creative projects like train accident avoiders, drones, solved puzzles and explored different concepts. It was an interactive and enriching experience.

~ Shlokh Gaddam, Class IX

Music: The Ambrosia of Life

Music is the universal language of mankind; it grants serenity to the mind.

Music can strike fire from the heart of men, Or tears from
the eyes of women.

Music can make us forget everything, Or remember
everything.

It can heal the wounds,

Which medicines can't improve?

Music, a higher revelation than all wisdom and philosophy, is enough to fight
against all atrocities.

If something has to be changed in the world,

It is only music which can make the tables turned.

Music is not take it or leave it, It is life or death.

When admitted to the soul, It becomes a spirit

And stays till our last breath.

~ Anushka Biswas, Class-IX

A Mesmerizing Journey: My Trip to Niagara Falls

Let us have a trip to Niagara Falls. Niagara Falls is a group of three waterfalls at the southern end of Niagara Gorge spanning the border between the province of Ontario in Canada and the State of New York in the United States.

In August 2023, I had a super exciting trip to Niagara Falls, Canada. I was so excited to see one of nature's coolest wonders - the famous waterfalls. The journey there was really cool. We drove through pretty landscapes and lovely towns, and I could feel the excitement building up. When we finally arrived, the falls were amazing. At night, they were lit up in different colours, and it looked magical. The night view was mesmerizing, and I couldn't believe how beautiful it was. The sound of the falls at night was like a soothing bedtime story. The falls were huge and powerful, the boat tour was like an adventure, and the parks around were peaceful. The night view was like something out of a fairy tale. I'll always remember the incredible beauty of Niagara Falls – nature at its best!

~ T. Ojas, Class - VII

JOY AND HIS LUCKY PEN

- Srishiti Singh...

1 Joy, has lost his pen
I lost my pen.

2 Moments the room when Joy was searching for the pen
You lost your pen again?

3 Mom, can I get another pen?
OK!

4 Atasho P
I want a pen
Here you go!
Gift Shop.

5 While he was returning home he met sam
Joy you let go our pen in school
Thank you

6 Joy told his mom "I got my pen"
my pen
Good

7 Joy went to his school and said thank you to sam.
Thank you!
you are welcome.

మనకై

నీళ్లు ముట్టలు క్రమే క్రమే!
తెల్ల చిన్నట్లు కమ్మరించు!
పుదురు తోట్లు పులకించు!
నీలతల్లి నీలం తప్పింతు!
వచ్చి చోరను వాచించుతు!
నిండు తోటను నీటి చిరుతు!
వాగు వంకలు అంగే అంజుతు!
చెరువు దొరువులు నీటి మురింతు!
వెండి పరిహా పరిచునట్లు!
ఎటు నూచున నిండు తోరవే!
అచ్చి చెట్లకు ప్రాణిమొచ్చెను!
అమ్మ తోడును అలుమునెను!
కమ్మ చూసా ఫలమొచ్చె!
జేబుల గొట్టుగ జున్నువొచ్చె!

The battle begins..... Run, Jump , Throw , Win

Play is the Brain's Favourite Way of Learning

The Council of Organs

(Scene: A grand chamber within the human body, where the organs have gathered for a debate to determine the superiority.)

Heart: Good day, esteemed colleagues. Today, we convene here to settle the age-old question - who among us is the most important, vital and powerful to the body's existence?

Lungs: I must insist that I am the breath of life and none of you would function without me! Oxygen is paramount; this makes me the most indispensable part of the body.

Brain: While oxygen is crucial, I coordinate all functions. I am the command centre of the body, the seat of intellect, memory, and consciousness. Without me, there would be chaos.....do you all understand?

Liver: My dear colleagues, let's not forget about detoxification! I keep all harmful substances at bay, ensuring the body remains pure and healthy.

Stomach: Oh come on, what about digestion? I, break down all the food, extracting nutrients and vitamins for all of you to sustain!

Kidneys: Please, Don't overlook filtration! I maintain electrolyte balance and remove waste. Imagine the consequences if I weren't here.

Skin: Excuse me, excuse me! but who protects the body from external threats? I am the first line of defence, keeping pathogens at bay.

Bones: Hmm....without my solid structure, how would any of you maintain your positions? Can you tell me? Keep in mind that I provide support, protection, and the framework to all of you.

Intestines: And what about nutrient absorption? I ensure that sustenance reaches every corner of this body.

Spleen: Let's not forget the immune system! I manufacture vital components, bolstering the body's defence.

Heart: Oh wow! it's so wonderful to know each one of you making valid points, but wait...without my constant and rhythmic beats, none of you would receive the resources you need to function.

Brain: True, very true, but please understand that without me, there would be no coordination or direction. I am the captain of this ship.

Lungs: Yet, without the air I provide, this ship would be stranded and lifeless!

Liver: And without me, toxins would overwhelm this body. I maintain its purity.

Stomach: But what good is purity without sustenance? I provide the fuel for all of you.

Kidneys: And what good is fuel without filtration? I keep the balance.

Skin: Without my barrier, all of you would be susceptible to harm.

Bones: Without my structure, there would be no platform and place for any of you.

Intestines: And what use of such a platform without the nutrients I **distribute?**

Spleen: And what good are nutrients without a robust immune system?

Heart: It appears that we are at an impasse.....

(There is a total silence in the chamber and everyone is sitting and thinking deeply about the discussion.) After a few minutes.....

Brain: Perhaps this is the lesson for all of us to understand that we are all equally indispensable and each one of us is contributing a vital piece to the puzzle of life.

(They all nodded in agreement, recognizing their interdependence and the importance of unity in the body's functioning.)

And so...

In the grand council of organs, they came to an understanding that no one was superior, for they were all integral parts of the symphony of life. Each plays a unique and crucial role, and it is their collaboration that allows the body to thrive.

Merry
Christmas

and
Happy New Year
