

T.I.M.E. SCHOOL , KANDLAKOYA

From the Correspondent's Desk

Dear Students and Parents

Greetings of the season !

"Education is our passport to the future ,for tomorrow belongs to the people who prepare for it today "

Education and academics are important for a successful life ,but skill development in students helps them become independent thinkers and encourages them to plan for their future. Students develop readiness to face challenging situations in their future ,as it contributes to holistic growth, self confidence, problem solving abilities time management and development of oneself.

The comprehensive skill set includes Cognitive, digital, technical and emotional skills .

One of the goal of NEP 2020 is to equip our youth with vital skills and knowledge to enable them to thrive in a technologically driven society.

In this dynamic ever changing, globalized world, it is imperative that students are exposed to STEAM education that combines Science &

technology Engineering, Arts and Math. This approach enables the students to do critical thinking and analysis and develop their problem solving skills.

We would like our students to be well prepared to face technological challenges in life . Hence we have introduced Robotics, coding and AI as part of skill education for our students of classes VI to X .

Personality development plays an important role in developing self confidence , improve the unique qualities in a child and helps them prepare for the future. This program has hence been introduced at the primary level.

We do hope that our students not only enjoy these classes ,but also benefit, hone their skills and show their mettle in this area too !

Best wishes to all

Jayashree Iyer

T.I.M.E School, Hyderabad

From the Principal's Desk

Dear Parents, Teachers and Students,

Welcome to the first edition of the *Drishikon* newsletter for 2024-25! As we embark on a new academic session, I am thrilled to extend my warmest greetings to each one of you. I trust that you have all enjoyed a restful break and are ready to dive into the exciting opportunities that lie ahead.

A special congratulation for our Class X students, whose dedication and hard work have resulted in an outstanding achievement of 100% results in the board examinations. Your success is a testament to your perseverance and the unwavering support of your teachers and parents. Well done!

As we open the doors to the 2024-25 academic year, I encourage all students to actively participate in school activities and external competitions. Engaging in diverse experiences not only enriches your education but also fosters personal growth. Remember, staying involved and committed to various endeavours which will help you achieve a well-rounded and fulfilling school life.

Equally important is maintaining a strong interest in your studies and keeping yourself in good health. A balanced lifestyle contributes significantly to academic success and personal well-being. Let's aim to work diligently and adopt new strategies to surpass the achievements of the previous year.

Let's embrace the challenges and opportunities of this year with enthusiasm and a commitment to excellence. Together, we will make the 2024-25 academic year a memorable and successful one.

Looking forward to a fantastic year ahead!

Warm regards,

Phanindra Bora
Principal

T.I.M.E. School, Kandlakoya

The Title of Responsibility

Here comes the day of 2nd July,
for someone, on whom the whole troupe would rely,
for someone on whom the whole alma matter would depend,
for someone who would hold the school banner and flag high.

Well do you see?

Yes, it is the INVESTITURE CEREMONY.

It was the Head Boy, leading the carcade proudly,
It was the Head Girl, adhering artfully,
With the Sports Captain, parading gladly,
Followed by the secretaries, blending smoothly.

It was then the captains with their 4 deputies,
Of course, were their vibrant colored troupes,
A perfect picture of responsibilities.

The oath to the esteemed authority,
was nothing less than a capability.

The oath made in a few lines,
was the promise of loyalty.

The solemn pledge taken with a whole heart,
was an inauguration of a new start.

Finally, shows up the symbol of capability,

Finally, got pinned with the Title of Responsibility.

~ AWANI KASHYAP
HOUSE CAPTAIN

I rejoined my previous school after two years because I wanted to continue my education in a familiar environment where I had previously built strong relationships with teachers and classmates. The school's supportive community and the quality of education it provides were key factors in my decision to return and complete my studies.

Some of the awards which I won in this school:

1. Gold Medal in a Chess competition organized by SLAN.
2. Distinction in GESE exam by Trinity College, London
3. Gold and Bronze medal in SOF olympiad.

Won various inter House competitions.

Interesting Space Information:

Isn't it interesting to realise that our planet isn't the only one which can support life? Well, the best part is that, this is probably true! And by using multiple space telescopes like the hubble space telescope, James Webb space telescope and many other telescopes, many space agencies like NASA, ESA, etc have looked at the sky and spotted planets just like ours! And to look into the deep details of such planets, the European Space Agency or ESA is fabricating a telescope named PLATO or PLANetary Transits and Oscillations of stars, which can measure the distance of the planet from the star it is orbiting so that we can understand if the planet is in a position where liquid water can exist on the planet's surface, if it is tidally locked to the star it is orbiting and much more! The telescope can also provides physical details of the planet itself with careful calculations.

The above picture is an artist's representation of the PLATO telescope in space.

The space telescope is expected to launch at the end of 2026. And with these many discoveries being made about outer space, it makes a lot of sense why we should be excited about our future!

SCHOOL ELECTION EXPERIENCE

My school election was very interesting. It was my first time voting in my life. Two days before the voting everybody from class-5 to 10 got a voter ID card, you will get a different colour voter ID's as per your house. We also got to listen to different people contesting for different posts. Personally I loved listening to different people's speech, on what they would do if they win and why we should vote for them. We also had the march past parade and a lot of other things. In short, the event was a grand success.

INVESTITURE CEREMONY

The investiture ceremony is a pivotal moment in a student's leadership journey, where elected leaders are formally entrusted with their roles. The importance of the investiture ceremony, lies in its ability to inspire and motivate. It is significant for its symbolic value, recognising achievements, upholding traditions, and marking the start of new responsibilities. It fosters unity and morale within an organisation.

As the head boy, I am committed to fostering an environment of respect, cooperation and excellence. My goal is to ensure that our school is a place where everyone feels empowered to achieve their best, and contribute positively to our community . I promise to hold my responsibilities with diligence and integrity, ensuring that I serve our school community with dedication and honour.

FIELD TRIP TO ICRISAT

The X grade students got the opportunity to visit ICRISAT in Patancheru, Hyderabad on 8th July.

It was fascinating to see how they are working to improve agriculture in dry regions adopting different types of machines and new technology. We learned about their research on crops like sorghum and chickpea, and their efforts to develop sustainable farming practices and enhance their agricultural productivity in semi-arid regions.

The staff were incredibly knowledgeable and passionate about their work. It was an eye-opening experience which underscored the significant impact of ICRISAT's work on food security and rural livelihoods.

FIELD TRIP TO INCOIS

From Classrooms to Coastlines: Our Adventure at INCOIS
On behalf of classes 9th and 10th, we embarked on an exciting field trip to the Indian National Centre for Ocean Information Services (INCOIS) on 5th July 2024. INCOIS, a leading institute, provides essential ocean information and advisory services. During our visit, we delved into oceanographic research, explored tsunami warning systems, and uncovered the critical role of ocean data in weather forecasting. We also learned about the valuable services INCOIS offers to fishermen, enhancing their safety and livelihoods. On behalf of classes 9th and 10th, we found our visit to INCOIS fascinating and enlightening, deepening our appreciation for ocean science and its practical application.

The Jungle Adventure of Anil, Andrew and Areef

Anil, Andrew and Areef were three inseparable friends who loved adventure. One summer, they decided to go on a river cruise that flowed through a lush green forest. The day was perfect, with clear skies and a gentle breeze. They rented a small boat and set off, excited for the journey ahead. While sailing they also enjoyed eating food, and drinking juice which they had brought with them. As they navigated the winding river, they marvelled at the beauty of the forest around them. Birds chirped overhead, and the sunlight filtered through the dense canopy of trees, casting a magical glow on the water. They were talking to each other and appreciating the natural beauty.

Everything was going smoothly until they heard a disturbing sound – a loud crack. Andrew looked down and saw water slowly seeping into the boat. Panic set in as they realized the boat had developed a crack and was starting to sink.

"Guys, we've got to do something fast!" Andrew shouted.

"Start bailing the water out while I look for something to plug the crack," Anil suggested.

Areef grabbed the empty bucket which was in the boat and began frantically scooping water out of the boat while Anil searched for anything that could stop the water from coming in. Despite their efforts, the water level kept rising, and it became clear that they had to abandon the boat and leave it as soon as possible.

"We need to swim to the shore before it's too late," Anil urged.

With no other option, they jumped into the river and swam towards the forested shore, leaving the sinking boat behind.

Soaked and exhausted, the three friends pulled themselves onto the riverbank. They found themselves in an unknown part of the jungle, far from any known paths or landmarks. To make matters worse, they had no food or water left.

"We need to find shelter and figure out how to survive until we can find our way back," Areef said, trying to stay positive.

As they ventured deeper into the jungle, they used their surroundings to their advantage. Anil, who had some knowledge of wilderness survival, led the way. They found a cluster of large trees with thick foliage that could provide some protection for the night.

"We'll rest here and keep watch in turns," Anil suggested. "We need to stay alert for any wild animals."

As night fell, the jungle came alive with the sounds of nocturnal creatures. The darkness was thick, and the three friends huddled together. They lit the fire with the lighter which Anil had, keeping the fire on to ward off any potential threats. They took turns keeping watch, listening intently for any signs of danger.

Around midnight, they heard rustling nearby. Andrew, who was on watch, woke the others.

"There's something out there," he whispered.

Anil grabbed a makeshift spear they had crafted, while Areef held a large branch. The rustling grew louder, and suddenly, a pair of glowing eyes appeared in the darkness. It was a wild boar, attracted by the smell of their fire.
